

Insect Screening And Framing System

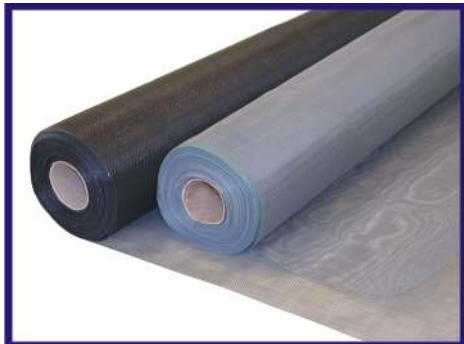

INSECT SCREENING

Woven mesh insect screening to prevent the passage of insect life into areas where exclusion is required. Can be used in many applications to help companies and individuals comply with increasingly stringent controls on health & safety, food hygiene and environmental regulations. Typical applications include commercial kitchens, equine establishments, agricultural & domestic in windows, doors, vents, soffits, roof spaces and many other areas.

PVC Coated Fibreglass Insect Screening

Unlike many plastic meshes which are susceptible to sunlight & heat, this premium quality PVC coated insect screening will not sag or ripple in use.

Specifications:

Material: Manufactured using a fibreglass yarn with a vinyl coating in the proportion of 38%-62% by weight, woven into a stable cloth fabric.

Mesh Count: 18 x 16 per inch

Open Area: 65.7%

Colours: Grey & Black (Charcoal)

Weight: 0.12kg per square metre

Grey 30m Rolls

1200mm wide 429486 £ each
1800mm wide 429489 £ each

Black 30m Rolls

1200mm wide 429496 £ each
1800mm wide 429499 £ each

Grey 50m Rolls

1200mm wide 429487 £ each

Black 50m Rolls

1200mm wide 429497 £ each

Bright Aluminium Insect Screening

For use when a more substantial mesh is required such as in commercial kitchens or where steam cleaning is necessary.

Specifications:

Material: Manufactured using an acrylic coated aluminium wire strand woven into a stable metal fabric.

Mesh Count: 18 x 16 per inch

Open Area: 72%

Colour: Bright finish

Weight: 0.16kg per square metre

30m Rolls

610mm wide 429460 £ each

30m Rolls

1219mm wide 429496 £ each

Insect Mesh For Soffits

Black mesh, 85mm & 150mm wide x 30m rolls

85mm wide

429485 £ each

150mm wide

429483 £ each

INSECT SCREEN FRAMING

This lightweight aluminium framing system is ideal for domestic or light commercial use. It is easily constructed & when used with lift-off hinges or turnbuttons, can be removed for cleaning & the white powder coated finish & slimline section make it unobtrusive when installed.

Aluminium Frame Section

Powder coated, roll formed aluminium screen section. 19mm wide x 11mm deep, 3 metre lengths.

Packs of 50 lengths

429405 £ per pack

Cross Brace

Powder coated, roll formed aluminium cross brace section required when screens are larger than 1.5m to prevent them from 'hourglassing'. 17mm wide x 8mm deep, 2 metre lengths.

Packs of 10 lengths

429410 £ per pack

Cross Brace Clips

Aluminium cross brace clips secure cross brace into frame channel prior to fitting the insect screening.

Packs of 100

429427 £ per pack

Plastic Corners

Rigid white plastic corners eliminate the need for cutting mitres on the framing.

Packs of 200

429423 £ per pack

Lift-Off Hinges

White plastic hinges with centre pin which allow easy removal of screens.

Packs of 100

429434 £ per pack

11mm Turnbuttons

White plastic turnbuttons securely fix screens to window frames & allow removal for cleaning.

Packs of 200

429436 £ per pack

4.1mm Ribbed Spline

Black plastic ribbed spline for securing insect mesh into the framing channel. 4000' roll.

429432 £ each

Spline Tool

Plastic handled double wheel spline tool; 1 convex & 1 concave wheel.

429447 £ each
